***The weights above are approximations; every animal is different so please allow for variation. You will know the exact weight of the beef at processing. Expect your take home meat to be 60-65% of the hanging weight depending on the cuts chosen. The quarter example above would yield approx. 100lbs*

**Note: Eighth beef orders have a standard sampling of steaks and roasts to give you the best variety of a small order. You are still welcome to customize your ground beef (size of packaging, etc.). Those ordering a quarter, half or whole beef receive priority. We highly recommend ordering a quarter.*

Processing details:
